

QUALITY POLICY

The Management of ENGINEERED LAND SYSTEMS, S.L. company dedicated to the design, manufacture, maintenance and repair of bodies in industrial vehicles, special vehicles and trailers for different applications, for civil, police and military use, has decided to implement a Quality Management System based on UNE-standards EN-ISO-9001: 2015 and PECAL-AQAP-2110 Ed.4 to increase customer satisfaction, improve their processes and the products and / or services offered to their customers.

Our quality policy is none other than to always offer the best to our customers to achieve their satisfaction. Aware of the importance of this commitment to quality and satisfaction, we structure our development through a Quality Management System, based on the following principles:

- Satisfy the requirements of our customers, strive to exceed their expectations and anticipate their needs.*
- Comply with the legal, regulatory and regulatory requirements applicable to our activities.*
- Ensure the quality of the products and / or services provided as a differentiating tool with respect to our competence.*
- Facilitate the level of training and necessary training for the efficient performance of the functions and tasks of our workers.*
- Continuous improvement of the quality management system, to improve the performance of our activities.*
- Establish quality objectives to favor continuous improvement*
- Identify opportunities for improvement at all levels of the organization*

The Management of ENGINEERED LAND SYSTEMS, S.L. establishes all the means and resources necessary for its implementation, as well as for this quality policy to be known, understood and put into practice at all levels of the organization.

For the effective application of these principles it is absolutely necessary to support them by all the staff working in ENGINEERED LAND SYSTEMS, S.L
